Will Hold Open Bonspiel

At a meeting of the curling club on Monday evening it was decided to hold an open bonspiel this season. A committee comprising Messrs. J. V. Berscht, T. Johnson, J. McCloy, A. McNair, L. L. W., Dr. Clarke, and W. G. Liesemer was appointed to make the necessary arrangements.

All local curlers who wish to enter are asked to give their names to the secretary as soon as possible.

A vote of thanks was passed to Mr. Frank Heseltine for the splendid ice provided to date.

Having completed two schedules, the redrawing of rinks for the second half of the season resulted in the following being chosen:

Brusso, skip; Kirby, Bob Gooder and Worde.

Dr. Clarke, skip; W. G. Liesemer, Rev. Mitchell and Phillipson.

Cook, skip; C. Reiber, Ranton and Halliday.

Edwards, skip; W. Wyman, Cathness and Moyle.

Fisher, skip; Fleury, Huget and John Morris.

Johnson, skip; Lee, McFarquhar and Russell.

Julien, skip; Weber, Woodcock and Lynch-Staunton.

Dr. Liesemer, skip; Kaufman, Dr. Evans and Grievess.

McCloy, skip; W. Morton, Eckel and Halton.

McNaughton, skip; Dooley, Frey and McRae.

Sinclair, skip; Bellamy, Klein and Kendrick.

Snider, skip; McEwan, Berscht and J. E. Gooder.

DIDSBURY vs. CARSTAIRS.

Didsbury sustained their unbeaten record a date where they shut out Carstairs 6-0 here Tuesday night.

Russell played a wonderful game in goal, though he received one in the mouth and is now minus a tooth.

It was Didsbury's game all the way and the scorers were: Hugst (22), Gooder, Robinson, Cook and Johnson.

Joint Installation At Crossfield

Over 250 Oddfellows and Rebekahs attended a joint installation at Crossfield last Wednesday evening, when the officers of Airdrie, Crossfield and Didsbury Oddfellows Lodges and Crossfield and Didsbury Rebekah Lodges were installed.

A large number of members from the local lodges attended, and the meeting was one of the largest ever held in the district.

The officers of Didsbury Rebekah Lodge were installed as follows:

P. G. Mrs. N. Hunsberger
N. G. Miss R. Clements
V. G. Miss N. Wilson
Rec. Sec. Mrs. J. W. Halton
Fin. Sec. Mrs. J. E. Gooder
Chaplain Miss J. Wilson
Warden Mrs. J. A. McGhee
Conductor Mrs. J. Develin
R. S. N. G. Mrs. A. C. Fisher
L. S. N. G. Mrs. E. Mortimer
R. S. V. G. Mrs. E. Marcellin
L. S. V. G. Mrs. F. Stevens
I. G. Mrs. C. F. Dooley
O. G. Mrs. A. W. Astell
Organist Mrs. J. Hugel
Bible Bearers: Mrs. W. J. McCloy, Mrs. O. Carleton

The officers of Didsbury Oddfellows Lodge were installed as follows:

P. G. E. Ford
V. G. J. W. Halton
N. G. N. Cole
Rec. Sec. P. Lind
Fin. Sec. I. Weber
Chaplain E. Marcellin
Warden K. Mullen
Conductor W. R. Hartley
R. S. N. G. E. Barnes
L. S. N. G. C. H. Ashdown
R. S. V. G. W. Abgrim
L. S. V. G. H. Abgrim
I. G. J. Morris
O. G. F. Fritz
J. B. Davidson
B. Atkinson

The Olds Choral Society will repeat the concert they gave some time ago, on Sunday evening, Jan. 31st in the Olds Auditorium. Music lovers of the district will again have an opportunity of hearing an excellent production.

LOCAL & GENERAL

Dr. and Mrs. Clarke were Calgary visitors on Monday.

J. Scrutton is announcing another good line in photographs. Three photos 7x9, in all colors for \$1.00.

Harold Hardy and Jim Duffy made a business trip to Calgary first of the week.

There will be service at Bethel Evangelical Church, Westcott on Sunday afternoon at 2 o'clock.

Arrival of new dresses at Mrs. Wilson's Style Shop, next door to Pioneer Office.

Mr. J. V. Berscht is attending the retail merchants' convention being held in Calgary this week.

Mrs. E. G. Ranton is visiting her sister, Mrs. A. Ormsby at Edmonton this week.

H. P. Hardy installed a full set of electric lighting plant batteries for Mr. L. B. Falkner this week.

The annual meeting of the town and school boards will be held in the High School tomorrow evening (Friday) at 8 p.m.

The erandle roll of Zion Evangelical Sunday School will be presented to the primary department during the Sunday School hour on Sunday morning.

Mr. and Mrs. Tom McSpadden and son, of Ogden, Utah, are visiting relatives in this district. Mr. McSpadden is a former resident of the district.

At their regular meeting to be held Saturday evening, the Canadian Legion will hold a special social evening. Every member is requested to be present, and they may also bring a friend.

Lost: On January 2nd, somewhere between Ed. Liesemer's, east and J. Luf's, west of Didsbury, a cloth robe, brown and green, partly well-worn and near one corner. Finder write to Harvey Burgess, Bergen, and receive reward.

C. G. T. hostesses from Canada, Scotland, Japan and Spain invite you to tea with them for 25c at the home of Mrs. Bowman from 3 to 6 p.m. Saturday, January 30th. Let Miss Ynterlin read your cup free of charge.

The sermon theme at Zion Evangelical Church, Sunday morning, January 31st will be: "Joseph, a Type of Christ." Rev. E. S. Spies will be the preacher. In the evening at 7:30 the pastor will conduct a "Question Box."

Without a doubt there will be a good crowd at the benefit ball to be given in aid of the Didsbury Hospital on Friday night. Those in charge are sparing no effort to make this one of the most successful dances of the year.

At the Opera House tonight, (Thursday) a stupendous drama "The Lawyer's Secret," with a five-star cast: Olive Brook, Charlie Rogers, Richard Arden, Fay Wray and Jean Arthur. It is interesting to note that Fay Wray is an Alberta girl. Also chapter 1 of the new serial, "Phantom of the West."

Two distinct programs at the Opera House next week: Monday evening, "Romance Control," with breezy Bill Haines. Fast, funny, and exciting. Thursday: "Those Three French Girls." You'll like these three love-making, laugh-making Parisian beauties. Friday: Dussay and Reginald Denny head the cast. Chapter 2 of the new serial, "Phantom of the West" will be shown both evenings.

The biggest kick this season was got out of hockey last Wednesday afternoon when the married men beat the bachelors in the time of 7-2. Jack McCloy says he deserves a big headline as he scored five goals and one assist for the married men, and Clint Reiber says the only reason the married men won was because he was out of town. It was some game. Westerdale beat Boshed in a tight game the same afternoon, the score being 2-1.

"Those Three French Girls," Ticking Farce-Talkie.

Reginald Denny and Fifi Dorsay head a dazzling cast in "Those Three French Girls," Metro-Goldwyn-Mayer's captivating farce of life in Gay Paris, which opens at the Opera House Thursday evening next for one performance only.

The plot of this talkie-farce contains a laugh in every reel and a howl in every line of its dialogue, which was written by P. G. Wodehouse, the internationally-known humorist.

The action centres about the fun-loving nephew of a British earl, played by Denny, who goes to Paris for a good time, and finds it. A company of two American ex-dancers, beyond three charming ma'noles. Complications occur when the nephew brings the girls to his uncle's home in an attempt to interest his rich relative in buying a model's shop. All would have gone well had the uncle not fallen in love with the very girl the nephew had picked for himself, but all the difficulties are ironed out in the end in a rollicking manner.

Coming Events

Geographical Tea, Saturday, Jan. 30th at the home of Mrs. Bowman from 3 to 6 p.m. Sponsored by the Senior C. G. T. Proceeds to be used for missionary and group purposes.

The annual meeting of the Community Hall School Fair will be held at the Community Hall on Saturday, January 30th at 2 p.m.

The Melvin Go-Gutters are holding a dance at Melvin School on Friday, February 5th. After lunch it will be a leap year dance. Good music. Admission: Cents 50c.

Canadian Legion's second annual Valentine Dance at the Opera House Friday, February 12th.

Play-Off Games Start On Friday

The Didsbury and Carstairs teams have amalgamated to play in the intermediate provincial play-off.

The first game of the home-and-home series will be played at Calgary against the Calgary Altomahs on Friday evening.

The return game will be decided on Carstairs ice Saturday night, 9 p.m. Total goals will decide the series and the winners advance into the second series.

Curling Notes.

The Olds curlers got the best of the local curlers last Wednesday evening, Didsbury losing both games at Olds when Hartman defeated Brusso 13-3 and Gooder got the best of McCloy 14-9. At Didsbury, Maybank won over W. G. Liesemer 9-8 and lost to Julien 6-11. Sam's won his two games, defeating Snider 9-7 and Dr. Liesemer 15-6.

Didsbury is represented at the Red Deer bonspiel being held this week, by two rinks, the personnel of which are: Bellamy, skip; Bellamy, McFarquhar, Cathness, McCloy, skip; Edwards, Wyman, W. Morton. Each rink played one game Tuesday, McCloy winning 17-3 and Julien losing in a 15 ends game.

On Monday evening the opening game of the new schedule proved to be the tightest evening's play of the season, when both rinks played to the best of Johnson and Snider got the best of Johnson, and Snider won out Sinclair. In the latter game the rinks had to be measured to decide the winner.

Messrs. Edwards, Sinclair, Johnson and McNaughton returned on Saturday evening after playing in the Calgary "series." They failed to bring home the bacon, but had many close games, several of which had to go to thirteen ends.

Marconi's Great Achievement

Millions of the earth's inhabitants sat in homes, offices, hotels, clubs, in railway trains and on ships, on December 12 last, and enjoyed one of the most marvellous demonstrations yet known in an age of marvels. People of many races, black white and yellow, speaking a veritable babel of languages, and of many creeds were, for the time being, brought together as one great family to enjoy an entertainment to which fifteen nations contributed and in which all participated.

The event was a world-wide radio hook-up to commemorate an achievement of thirty years ago which has revolutionized methods of communication, transformed social conditions, altered our forms of entertainment and information, and been the means of saving countless numbers of lives.

Thirty years ago, (December 12, 1897), at noon, a young man of vision, imbued with the enthusiasm and confidence of youth, sat in an old shack on Signal Hill, Newfoundland, and waited patiently for something to happen; something which, to the knowledge of man, had never before occurred. He was Marconi awaiting to convince an incredulous world that it was possible to send a signal across the Atlantic Ocean by wireless telegraph. Marconi and two assistants waited until in the earphones they heard at the appointed time the "click, click, click" of the three dots of the letter "S" in the Morse Code, which had been the signal agreed upon to be sent from Poldhu, Cornwall, England.

From that historic moment to December 12, 1931, the world had been constantly growing smaller, time and space were eliminated. The pressing of a key eighteen hundred miles away had been heard in the nearest fraction of a second. In the thirty years which have passed, vast strides have been made in world communication, but no wireless message has crossed the Atlantic any faster than that first one of Marconi.

Today we sit in our homes before ornate radio sets and by the simple turning of a dial shift ourselves from the music and speech of New York to that of San Francisco; from Ottawa to Vancouver; from Edmonton to Mexico, or, as on December 12 last, we listened to speech and music from London, England, then Brussels, then Paris, Berlin, Rome, Warsaw, New York, Washington, Ottawa, Japan, Hawaii, Venezuela, Brazil, the Argentine. We heard a message being transmitted from New York to San Francisco, from whence it was sent to Java, then to Amsterdam, and we heard it being received back in New York after circling the globe in one minute and 47 seconds. We heard English, French, German, Italian, Spanish, Japanese and other languages spoken.

All because Marconi's great experiment of December 12, 1897, succeeded. The world was astounded then; it marvels still. Following that first grand came the development of wireless telegraphy, then wireless telephony was made possible by the invention of the vacuum tube, and now television is just around the corner. The vacuum tube led to the discovery of the photo-electric cell, that marvellous sensitive little tube which made talking pictures possible, which opened and closed doors, counts vehicles on the highways, and does many other most astonishing things.

Airplanes are guided by wireless as they wing their way through space; the wireless "ROS" call brings help to stricken ships; the radio summons medical or other assistance into the far frozen north; His Majesty the King addresses his people in every portion of his far-flung Dominions; church services and the finest of the world's music and other forms of entertainment are carried into the most isolated and humble home.

But no one listened on December 12 last, to the nations talking to and questioning each other, switching from one continent to another almost quicker than the mind can think, the conviction grew that, great as all these achievements are, something even greater and grander must inevitably result from Marconi's amazing experiment. Will not this annihilation of time and space, this breaking down of barriers to communication between peoples and nations, this development of a common means of expression between peoples, also lead to the breaking down of old suspicions, prejudices and jealousies? Shall we not learn to discard the old, mis-used word "Enemy", and instead, come to regard those who live under other flags, who speak languages other than our own, and who worship at altars somewhat different from those at which we may worship, as neighbours, friends, and brothers?

In honoring Marconi for his great achievement, may we not also hope that over and above all the material benefits he thus conferred upon us he has been an effective instrument in the hands of an all-wise Providence in promoting the brotherhood of man and the federation of the world?

An Expensive Position

Necessary For London's Lord Mayor Formerly An Exporting Country Is To Have Private Meals

The city of London allows its Lord Mayor 450,000 for expenses which normally amount to about 125,000. Banquets, luncheons, civic entertainments and the charities account for a considerable part of this sum. The Lord Mayor can count upon at least three private functions in every two days and he has to make a speech, with few exceptions, at each. He works hard and his public luncheons and dinners mostly consist of waiting on other people eat. At the end of the year there is usually a banquet, awaiting the Lord Mayor, sometimes a pageant.

Australia Making Macaroni

Carrying 1,600,000 cartons of spaghetti and macaroni, the steamer "Dorabrad" sailed recently from Australia for the United Kingdom.

This shipment is the first of its kind of major proportion to be sent to Britain and marks a bid by South Australia to capture the British market, whose annual requirements exceed 5,000 tons. The growth of the new industry followed the successful growing of a suitable red wheat in South Australia. Australia previously had been an importer of macaroni.

Columbia will regulate food prices.

Her Heart Was So Bad Couldn't Do Housework

Mrs. S. Dragoman, R.R. 2, Midland, Ont., writes: "I had been troubled with heart trouble for many years. My heart would beat so fast I could hardly breathe, and I had headaches, and dizzy and fainting spells. I couldn't get my housework done I was so weak. I took three boxes of Milburn's Heart Nerve Pills and felt much better, and now I would not be without them in the house."

Price 50c a box

Bought at all drug and general stores, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

Communist Towns In Russia

Where Children Are Educated and Family Life Destroyed

On the East side of the Ural, in the neighborhood of the enormous ore deposits of the so-called Magnet Mountain, a communist town will arise in the middle of the Steppes. The town will be given the name of Magnitogorsk, and will have a population of 200,000. The town must be finished in 1937. The Russian architect, Mr. E. Zhuk, has drawn up the plans. It will be built on a spacious scale, with many parks. The Russian Peoples Commissioner writes as follows:—"The dwellings for all inhabitants will be the same. Till their 18th year, all children will be educated in a town institution where the parents will be allowed to visit them but not too frequently. The fathers and the mothers name may not be used. Communism aims at the destruction of the family and the creation of the collectivist man and woman. Cooking will take place in a central kitchen and the meals eaten in common." Towns of this nature, but on a smaller scale are in Stalingrad and Soerfiro, near Moscow.

Worms, however generated, are found in the digestive tracts, where they set up disturbances detrimental to the health of the child. There can be no comfort for the little ones until the harmful intruders have been expelled. An excellent preparation for this purpose can be had in Miller's Worm Powders. They will immediately destroy the worms and correct the conditions that were favorable to their existence.

Recipes For This Week

(By Betty Barclay)

SCALLOPED OYSTERS

25 oysters with liquor.
3 cups bread crumbs.
1/2 cup milk and cream.
2 tablespoons butter.
1 tablespoon salt.
1 teaspoon pepper.
Grease baking dish and cover bottom with bread crumbs; lay oysters in carefully; season and cover with bread crumbs; pour over milk, oyster liquor and cover top with butter. Bake in hot oven at 425 degrees Fahrenheit about 20 minutes.

LEMON MINCEMEAT

4 lemons.
2 apples.
1 pound currants.
1/2 cup raisins.
1/2 cup chopped nuts.
1/2 cup melted butter.
2 cups sugar.
1 teaspoon salt.
1 teaspoon ground cinnamon.
1 teaspoon ground nutmeg.
1 teaspoon ground cloves.
1 teaspoon ground ginger.
1 teaspoon ground allspice.

Squeeze juice from lemons and cook peels until soft. Put through meat-chopper and then rub through a sieve. Add chopped apples and remaining ingredients, mix well and store in jars. Use as a filling for turnovers and pies.

Doing Welfare Work

Czechoslovakia Has Established Shelters For Jobless Boys and Girls

News comes from Czechoslovakia that its Ministry of Social Welfare has ordered the establishment in twelve cities of shelters for unemployed boys and girls 14 to 16 years of age. A government appropriation has been made to aid the work, but each city is responsible for providing quarters, food, and lights. These shelters offer warmth, food, and recreation during the day, and instruction in personal hygiene and other subjects.

Pennsylvania imports four-fifths of the lumber it needs.

Winners Of Peace Prize

Nobel Award Goes To Jane Addams and Dr. Nicholas Butler

The Nobel Peace Prize for 1931 was awarded to Jane Addams, Chicago social worker, and Dr. Nicholas Butler, president of Columbia University, the consular-general of Norway announced.

At a meeting of the Nobel Institute at Oslo, Norway, Professor Fredrik Stung, president of the Nobel committee of the Norwegian parliament, announced each would receive one-half of the amount of the prize. The amount of each prize varies with the income from the fund established under the will of A. B. Nobel. In recent years the amount has been in the neighborhood of \$10,000.

United States citizens who have previously won the peace award are: Theodore Roosevelt, in 1906; Elfrid Root, in 1912; Woodrow Wilson, in 1919; Ambassador Charles G. Dawes, in 1925; and former Secretary of State Frank B. Kellogg, in 1929.

Dr. Nathan Soderblom, Archbishop of Upsala, received the peace prize in 1920, when the Nobel awards approximated \$16,000 each.

Troubles Of Business Men

Frogs Take Place Of Money In Trade Deal

St. George Belmire, prominent industrialist, of London, England, described how a business deal was put through with frogs used for money.

"One of the companies I am connected with had money laid in currency in a certain foreign country and a complete embargo as to forwarding money to that country was made," he said.

"By mere chance this company came in contact with a professor of anatomy who was importing for vivisection purposes live frogs from this particular country and the change was made from currency to frogs. "Could anything illustrate more clearly the lengths to which business men have to go today in order to carry on?"

Simple and Sure.—Dr. Thomas' Elettrectic Oil is so simple in application that a child can understand the instructions. Used as a liniment the only direction is to rub, and when used as a dressing to apply. The directions are so plain and unmistakable that they are readily understood by young or old.

Protecting the Children

Playgrounds are provided for the children of Salford in the most crowded areas in 102 streets which are closed to motor traffic. The result is that the number of fatal street accidents to children have been cut down to almost half.

Headache Relieved without Dosing

Vicks rubbed on or melted in hot water and inhaled usually relieves

VICKS

2 VAPORUB
OVER 75 MILLION JARS USED YEARLY

Would Require No Motor

If Airship Built On Principle By Which Birds Soar

After twenty years of study of the flight of birds J. H. Montgomery of St. Gabriel has apparently solved the secret of the flight of birds. He has discovered that in the wings of every soaring bird is a power plant, with which the bird has nothing whatever to do further than his ability to control it. Montgomery said: "Contrary to the prevalent view of scientists, birds do not fly by taking advantage of air currents, but their power to soar is due to the structure of their pinions, which are filled with thousands of vortices which catch the air." According to Montgomery, the same principles by which birds soar could be applied to a new type of airship, which would require no motor, but could be regulated to fly at any speed up to 350 miles an hour.

Persian Balm is inevitably chosen by discerning women. Delightful to use. Subly fragrant. Cooling and refreshing. Imparts a rare youthful charm to the complexion. Invaluable for softening and making hands flawlessly white. Tones and stimulates the skin. Useful for the family also. Protects the tender skin of the child and is excellent for the father as a hair flaxative and cooling shaving lotion.

An Unusual Accident

Needle Two Inches Long Driven Into Man's Heart

That Edward Sell, 45, of Hayes, England, carried a needle in his heart for more than four weeks has been revealed by X-rays. Sell was working on an aeroplane when a needle in the apron of an upholsterer was driven into his breast. It was considered too dangerous at the time to operate. Four weeks later an operation was tried, but had to be stopped before the needle was removed. Sell died soon afterward, and a needle two inches long was found in the left ventricle of his heart.

Arlomus Gazette: A scientist says it is the lower part of the face, not the eyes, that gives away one's thoughts. Especially when one opens the lower part of his face.

Don't Let Foods Stale

Foods that ordinarily stale quickly will stay fresh and tempting a surprisingly long time if you cover them with Para-Sani Heavy Waxed Paper.

Your grocer, druggist or stationer has Para-Sani in the handy, sanitary knife-cut carton. For those who prefer a lighter paper put up in sheet form ask for Appleford's "Centre Pull" Packs.

Agricultural Council For Working Out Farm Problems May Soon Be Established

Initial steps towards the formation of an organization in the nature of a Dominion Agricultural Council, the first purpose of which would be to co-ordinate all farm organizations in Canada to enable them to work out their joint problems, were taken at a meeting held in Toronto recently of representatives of the various farm bodies, departments of agriculture and other interested organizations. W. Sanford Evans, Winnipeg, president of the meeting.

The meeting was called on the order of the Canadian Chamber of Commerce, upon the authority of a resolution which was passed at the convention of the organization held in Regina in September of this year. Following is the text of the resolution:

Resolved that the Canadian Chamber of Commerce take the initiative in an endeavour to secure the co-operation of agricultural producers, the trade, a number of outstanding business men, the Federal Department of Agriculture, and of Trade and Commerce, and the Provincial Departments of Agriculture in bringing about the establishment of a Canadian institute of agriculture, whose functions would include a thorough and continuous study of agricultural problems and of marketing possibilities in Canada and other countries, the extension of existing markets and the promotion of new markets; and the dissemination of information as to the present and prospective requirements of individual markets, as to quantity, quality, period of supply and the sales and other channels through which such may be fully developed.

At the conclusion of the meeting a committee was set up to draft a constitution and while the general meeting did not go at any great length into detail, some indication of the type of organization to be set up may be gathered from the following classes which were unanimously approved by the meeting with the definition of the scope and purpose of the organization. They are as follows:

The objects of the organization shall be:

1. To promote the welfare of all those engaged in the industry of agriculture in all branches.
 2. To promote co-operation between the agricultural organizations of Canada where such co-operation may be useful to agriculture, and to attend to such common tasks as are not exercised by the individual organizations, but so that the individual organizations should continue to exercise the particular tasks that fall within their special scope.
 3. To be at the disposal of the government as regards agricultural questions and to submit proposals for legislative measures which are deemed to be of benefit to agriculture.
 4. To represent agriculture in its relation to the other industries of the country.
- It was apparent during the discussion that there was some difference of viewpoint as to whether the organization should be formally made part of the Chamber of Commerce or whether it should be constituted of other organizations besides.
- After further discussion the view-point seemed to prevail at the outset that the organization should consist of agricultural organizations themselves.

leaving it to the organization when constituted to take its own measures to procure co-operation with other business interests in Canada where such co-operation would appear to be of national benefit.

It is the intention that the committee should proceed with the drafting of the constitution promptly and report back to all the organizations represented at the conference at Toronto as a preliminary step to having such conference and assembly later for the purpose of adopting the constitution and putting it into effect.

The meeting was acknowledged to be the most representative meeting of the kind ever held in Canada.

By Annette

THE NEW MODE IS JUST AS KIND TO THE CHILDREN AS THE ADULTS

Any little miss would adore this jumper dress that big sister is wearing at college.

It delights in the fact that it is an exact copy too of the grown-up model. Even to the fabric which is thin woolen in a small check pattern in light navy blue and white. The belt is blue shiny patent leather.

The tailored blouse chooses a cotton broadcloth in yellow-beige. The circular swimming skirt necessarily attracts much attention with the growing miss, who so loves to feel important in clothes of smart sophistication.

Style No. 187 may be had in sizes 6, 8, 10 and 12 years.

Coral-pink linen with white dotted Swiss blouse is so pretty.

Sailor blue wool jersey with white braid dots in matching blue is another lovely choice.

Twined, two-like cottons, wool crepe, cotton shirting patterns, pique, cotton broadcloth prints, ginghams, tub silks, etc., are suitable and smart fabrics.

All patterns 25 cents in stamps or coin (cash preferred). Wrap coin carefully.

Cambridge Gardens Has Interesting Specimen

Banana Which Has Grown Straight Instead Of Curved

There is a straight banana in the botanical gardens at Cambridge.

It is one of a bunch of two dozen, the others being curved as usual. It is 4½ inches long. There has been no effort to cultivate it. It has just happened.

Gardens at first began, timidly, to say, "It looks as though that banana is going to be straight." Now they claim proudly that it is straight. In the academic atmosphere of these gardens officials do not continue too much over such a matter, but they admit to having an interesting specimen of Musa Cavendish.

It is expected to ripen in due course. It shows no signs of going crooked, and promises to be the first banana to land a really straight life.

Tell The World

If You Have What People Want Advertising Pays

A partner in a successful eastern department store some time ago told a group of business men that, in his many years' study of advertising had failed himself down to the simple formula, "Find out what people want and then tell them about it."

Analyzed, this will be seen to include a whole philosophy of advertising, to be, in fact, the keystone of the arch. For, after all, one thing the consuming public always wants is honest, dependable goods. So whether it be radio sets, or cold cream, or carpets, if their quality be unimpeachable, the logical way to clear them off the shelves is to tell the world about them.

Seek Advertising

Campaign 'On Fish

Ottawa Asked To Assist In Coast-To-Coast Publicity

Assistance of the Dominion Government in conducting a coast-to-coast newspaper advertising campaign to increase consumption of fish in Canada is being sought. A. H. Brittain, president of the Canadian Fisheries Association, said, here recently. Efforts are being made to obtain a fund of \$150,000 for the purpose.

Official comment was not available on the above proposal, but it is known that the Minister of Fisheries, Hon. E. N. Rhodes, is keenly interested in such a project.

Careful Experiments Prove Grain Taken From Egyptian Tombs Will Not Germinate

During the past few months there seems to have been an unusual revival of interest in the vitality of wheat claimed to have been found in the tombs of ancient Egypt. Samples of this so-called "mummy" wheat have been received by the Cereal Division, Experimental Farm, Ottawa, within recent months, from farmers who claim to have produced the said seed from samples coming directly from these Egyptian tombs, says L. H. Newman, Dominion Cerealist. State-ment have also appeared in the press which might lead one to believe that the tombs of Egypt appear to possess some mysterious power to preserve the germinating ability of cereal grain for a long period of time. Apparently these statements have attracted the attention of a number of Old Country people who have applied to certain officials of the British Museum for information as to whether or not wheat stored in tombs for a long period of years is capable of growing. As a result of these enquiries Sir Ernest Wallis Budge, keeper of Egyptian antiquities in the above museum, published the following article in the London Times recently.

"Three gentlemen connected with the press have rung me up and told me that they had received a report from America that a distinguished farmer had succeeded in making wheat grow which he had obtained from the tomb of Tutankhamen. And they asked me if I believed that such a thing was credible.

"During my years of 'service as keeper of Egyptian antiquities in the British Museum I was asked this question either by letter or by word of mouth on an average twelve or thirteen a week, and the director received many letters asking the same question. Dr. Birch had said, 'Ancient Egyptian wheat will not grow,' and we gave that as an answer to inquiries. Since by letter or by word of mouth the opportunity of laying, in 1897, at my own cost, in Western Thebes, a good specimen of a wooden model of an ancient Egyptian granary, which had just been found in a tomb of the Nineteenth Dynasty, 1290 B.C. It contained little time and the usual storehouse, and the whole space not occupied by the bins

was covered with a layer of date-juice brown grain, wheat or barley. I know not which, several inches deep. I poured out the grain into a leather bag and brought it home in due course.

"I suggested to the director that we should give some of the grain to the authorities at Kew Gardens and ask them to make a careful experiment and let us know the result. With his approval I wrote to Dr. Thistleton Dyer, the curator, and asked his help, and he promised to give the planting of the grain his personal care and attention. He prepared soil and divided the grain into four little heaps, and he planted each heap separately, and covered each little plot with glass of a different color—white, yellow, red and blue. The whole of the Kew staff was intensely interested in the experiment, and many botanists joined them in waiting for the grain to germinate. They waited day after day, week after week, but no shoot of any kind appeared. At length, after three months, they turned over the little plots and found that all the grain had turned to dust. As a result Thistleton Dyer reported that ancient wheat or barley would not grow, and then went on to talk about the shoddiness of the light, the germinating properties in grain generally. Many others tried the same experiment, with the same result.

Color Is Not Artificial

Salmon In Can Is Just As Native

Contrary to what some of the uninitiated may have thought, there's no artificial coloring matter added to Canadian canned salmon to give it the shades of red and pink which are familiar to the users of this nourishing sea food.

There is nothing in a tin of Canadian canned salmon except the fish and some of its juices, and a dash of salt.

The colour is as Nature made it, except that the shade may be less pronounced than it was in the freshly-caught fish. Canned sockeye is a rich red. The other varieties of salmon are of different shades of pink. But pink or red, the colours are natural.

Research carried on in recent years goes to show that the colour of salmon flesh is composed entirely of red and yellow pigments. In the canning process the colorings become somewhat less marked, although it is not yet certain whether an actual fading occurs or only an apparent fading as the proteins become coagulated.

Writes Longest Poem

Father Blatter Has Outdistanced Dante By 15,000 Verses

Father John Blatter, parish priest, has announced completion of what he claims is the longest poem ever written, containing 25,000 verses.

Father Blatter, who is 71, and he started the work when he was 20. Besides outdistancing Dante by 15,000 verses, he said his poem included the story of three visits to inferno where Dante's work embraces only one.

Charcoal is now being manufactured from waste wood in Fraser Valley, B.C.

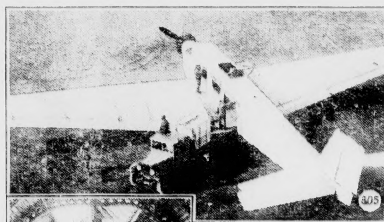

A train of thought is the real thing in rapid transit.

"What will you do when there are no more horses?"

"By that time old motor tyres will be cut up for sausages."—Dorfbacher, Berlin.

A Freight Car on Wings

Would there be untold resources which some day will make Canada one of the richest countries in the world. The Ju-52 is his contribution towards the mammoth job of unravelling the map of Canada and of giving to the Canadian people the most efficient air travel system with the least delay possible.

Built to carry a load of 5,850 lbs. for a distance of 200 miles with a crew of two and having a normal flying range of 502 miles in 1½ hours flying time, the Ju-52, recently brought from Germany aboard the Canadian Pacific freighter "Leavenworth" to the order of Canadian Airways Limited, will revolutionize air traffic in Northern Canada.

This flying box car will transport large pieces of mining equipment, machinery and supplies to the Far North, right up to the Arctic Ocean, and will help open up new territories, new resources of inexhaustible mineral wealth to effective exploitation. James A. Richardson, president of Canadian Airways Limited, believes that north of steel, deep in the heart of the North West Territories and be-

It has a single cargo space of 990 cubic feet occupying the top part of the fuselage which can be loaded from an airlock backed up to a large side hatch, having internal measurements, 70 feet by 49.5 inches located in the rearmost bay and provided with a substantially built platform for a maximum load of 1,453 lbs. Another large hatch on the roof can be loaded from a crane in the same way as freight is lowered into a ocean-going vessel. For further convenience there is a door opposite the side hatch; a side door in the foremost bay and four loading ladders in the second and third bays.

An important innovation is the Double Wing Juniper patent which permits larger and heavier machines to be landed on smaller aerodromes and be-

Ski Runners of the Canadian Rockies

With a field of activity unequalled the world over the new winter sports association the Ski Runners of the Canadian Rockies, is rapidly coming into prominence among skiers and winter sports enthusiasts generally. The new organization is patterned largely after the famous Trail Riders and its locale, unequalled for scenery and facilities on this continent and probably without a rival even in Europe, is Banff, in the heart of the Rockies, with runs and trails varying from one to ten days in duration and covering the world-known objectives as Mount Assiniboine, Simpson Pass, Shadow Lake, Lake Louise, Parangana Valley and Park, Hot Lake and Pipestone Pass. Sliding over some of the most beautiful scenery as late as June when skiers are enjoying golf and canoeing and fishing in the valleys below. But the sport begins in November each year.
A standard feet above Banff at about an hour's ride from the town is a lodge built on the pass between Mount Norde, and Mount Sennar. From this lodge runs radiate in all directions with cabins and chalets at strategic points for rest and refreshment. There is a 24 metre jump at Buffalo Park and every year in February this year February 14th a tournament is held where the pick of Canadian and out-of-the-country compete.
Last night shows (1) Ski track across a vast snow with Mt. Assiniboine, 11,500 feet high, in background, (2) Canadian Pacific Hunsdale Camp at Magic headquarters for sleds for at Mt. Assiniboine, (3) Mount Norde, (4) Lodge, 1000 feet above Banff, overlooking the Bow River, with dog team in foreground and (5) The Tower, on Wonder Pass, near Mt. Assiniboine, one of the finest winter scenes in the Rockies.

WORLD HAPPENINGS BRIEFLY TOLD

The Canadian Reel Growers' Association will hold its 1932 convention in Winnipeg.

The Cecil Rhodes scholarship for British Columbia has been awarded to William Thomas Brown.

Census figures show the Jewish population of Palestine has more than doubled since 1922, the total being 175,000.

The question of establishing a county system in Alberta is under consideration and will be up for discussion in the near future, it was announced by Premier Brownlee.

Commenting on railway difficulties, Premier Henry, of Ontario, said the railways should enter the auto field if they want to keep up with the times.

An investigation of the movement of United States industry to Canada was asked in a resolution introduced by Representative Canfield, Democrat, Indiana.

Three thousand workers were thrown out of employment when the Canad line suspended work on its giant new liner at Clydebank, Scotland.

A commercial treaty between Great Britain and Soviet Russia is strongly urged by the executive committee of the Association of British Chambers of Commerce in a report just issued.

Capt. George Stavakov of Victoria, B.C., arrived at New York from abroad to conduct experiments with Chernikoff's log, a device for measuring the speed and distance travelled by submarines.

Canada, among other countries, will be affected by an arrangement by Finance Minister N. C. McLaughlin that the South African Government would make effective an exchange anti-dumping duty.

Thirty years ago Guglielmo Marconi, in Newfoundland at the receiving end of the trans-Atlantic wireless setup, picked up the first true signals ever sent across the ocean.

Cathedral Destroyed

Soviets Dynamite Most Conspicuous Building in Moscow

Dynamite was exploded in the old Cathedral of The Redeemer recently to complete the work of demolition started some time ago. The blasts were set off at intervals of an hour and by mid-afternoon almost the entire side of the great granite structure facing the river had been torn away.

This was the largest church in Moscow and the city's most conspicuous landmark. In its place will rise a modern building to be known as the Palace of the Soviets.

Designed Million Dollar Staircase

Englishman Who Achieved Fame in States Is Dead

Lewis J. Hinton, 86, designer of the million dollar staircase at the New York State Capitol and at one time an active leader of union labor in England, his native land, died a few weeks ago at his home in Albany.

Mr. Hinton was born in London and came to the United States in 1869 to design and create stone work at Cornell University. He became a citizen soon after his arrival.

By exposing certain kinds of food-stuffs to ultraviolet rays, a way has been found, it is said, to restore vitamins destroyed by cooking.

Look here young man, you are travelling with someone else's pass. The hobby of this is described as having a beard.

"Yes, I have, or had it shaved off."

—Margaret Butler, Munich.

W. N. U. 1921

Should Use Union Jack

Needs More Display in Canada Says Ontario's Attorney-General

Hon. W. H. Price, Ontario Attorney-General, has instituted an inquiry as to the feasibility of having a Union Jack installed in every courtroom of the province. Speaking at Uxbridge at the unveiling of a new memorial Col. Price made this announcement at the same time emphasizing the necessity of keeping fresh in the minds of Canadian people the deeds of those who died in war. "We have been remiss in not putting forward our flag in such a manner that every Canadian-born citizen and every naturalized subject will know the history of our institutions and our traditions," said Col. Price, unveiling a monument to Uxbridge's Great War dead in the town square.

The flag is now down on every courthouse while courts are in session, but the flag could very well be installed on a staff in every courtroom. The people of Canada were woefully deficient in historical knowledge, the attorney-general declared. They failed to read books on early adventure, pioneering and history of the country.

Likes the Arctic

The lure of Arctic waters is in the blood of Stephen Dacey, of Halifax. Home after four years in the Hudson Straits region, he is eagerly looking forward to another period of service at a wireless direction station nestled among native igloos and trading posts in one of Canada's outposts.

There are ten million Chinese, children and adults, in school in that country.

British Economist Not Good Forecaster

Gloomy Prediction Some Years Ago Fails to Materialize

Sir George Paish, British economist, who predicts the world's economic system would break down in a few months, once made a gloomy prediction about Saskatchewan that failed to come true. E. M. Schanber, commissioner of the Saint John Board of Trade has recalled.

Sir George is said to have declared Saskatchewan would never recover from the real estate collapse of 1912. "Saskatoon was the first western city to achieve an even keel financially," said Mr. Schanber, who added he regretted a man of Sir George's eminence should make such a gloomy prediction at a time when confidence was needed.

Primitive Hunting

Boys in North Woods Hunt Rabbits With Sling-Shots

The boys attached to the Hankin trans-Canada Highway construction camp near Mattawa, Ont., have gone primitive. In order to share the excellent rabbit hunting accorded by northern Ontario's "great outdoors" they had to overcome the difficulty of lack of firearms, which are prohibited in the construction camps. They did this and, armed with sling-shots, they went out to the chase. They returned with 15 rabbits.

Awaiting Strict Reply

The British Government has sent a note to France asking for a reply to representations previously made regarding the 15 per cent. French surtax on imported goods.

English Doctor Claims Cure For Rheumatism

Uses Serum Prepared From Microbe Responsible For Disease

Cure of rheumatism, also called arthritis, by injection of a serum prepared from the microbes responsible for the disease, is possible, according to Dr. H. Warren Crowe, London-England.

Speaking before a group of physicians at a meeting of the American Society for the Study of Arthritis, Dr. Crowe said he discovered the value of a vaccine in the treatment of rheumatism by applying it to his wife. He stated the cure was so rapid as to fall little short of being dramatic.

The vaccine treatment, which he declared could be used by the general practitioner everywhere, was endorsed by other speakers, including Dr. Martin E. Rehfuess, Philadelphia, who asserted no drug had been found to cure the disease.

Dr. William W. Lermann, Pittsburgh, said the arthritis was an industrial and social, as well as a medical problem.

"In England it is responsible for one-sixth of all industrial disability," Dr. Lermann said. "Until recently it was considered incurable, and as a matter of fact was incurable, because the cause was not known; now it has been found to be a bacterial infection. The microbes which produce the disease are of the streptococcus group. Unfortunately, more than one kind of streptococcus will cause rheumatism, hence it is necessary to find out what kind is responsible before treatment can be given."

Prince Used His Influence

Special Leave Granted For Son To Visit Dying Mother

How the Prince of Wales brought a soldier of the tank corps from Egypt for a deathbed reunion with his mother in an Oxfordshire village was revealed by Dr. Gordon Robinson, now of Tow Law, County Durham, and formerly of Witney, Oxfordshire.

So long as the woman lived Dr. Robinson was pledged to secrecy, but the recent death of Mrs. Frene, of Minter Lovell, Oxfordshire, has released him from that pledge.

Realizing that she was beyond medical aid, Mrs. Frene, Dr. Robinson said, gathered her family about her, told them of her fate, and wrote to her son serving in Egypt, asking him to try to get special leave. He was unable to do so.

She wrote to the war office and the Premier without avail, and then to the Prince of Wales.

The first reply from St. James's Palace was formal, the prince's secretary intimating that the prince could not intervene. But a few weeks later came another letter from the prince's secretary announcing that the leave had been granted.

"There was a happy reunion," said Dr. Robinson. "The mother lingered, but when she died her son was at her bedside and she died a happy woman, grateful to the prince who understood a mother's feelings."

Too Much Speculation

First Sign Of Returning Prosperity Starts People Off

The world is always ready to forget the lessons of the past, even when they are so recent that one would expect them to be fresh in every mind. What has been happening in the wheat market in recent weeks is almost sufficient reason to say that, given an opportunity, all the world and his wife will be speculating as heavily in 1932 as they were in 1928, and with as little caution and good sense. . . . Inexperienced gamblers are just as likely to get their fingers burned as they were in the past. It is not pleasant to see the first concrete sign of returning prosperity, a substantial rise in wheat prices, marked by immediate and widespread resumption of the speculation which helped to produce the crisis of 1929. —Winnipeg Tribune.

Fishing Grounds Improve

Although the fishing is heavier than ever in the North Sea, it is stated that the more fish are taken out the bigger grow those which are left, and that the fishing grounds are getting better every year.

Keystone Of Empire Trade

Canada Recognized As Greatest Factor In Imperial Situation

Some time next year, probably in the early months, the various governments of the British Commonwealth of Nations will need delegates to Ottawa to work out a basis for the development of inter-Empire trade.

Because all the Dominion Governments as well as the Government of Britain will wish to make this conference a decisive one, emphasizing the actual machinery rather than the platitudes of commerce, the meeting will have an importance far beyond anything of the kind yet attempted.

For this reason the press representation will probably far exceed the representation of the governments themselves.

Would it not enable these press representatives of Britain, of New Zealand, of Australia and of South Africa to write with infinitely more understanding and intelligence of their subject if they were sent out three weeks or a month ahead of the actual conference date to tour Canada and to familiarize themselves with productive and commercial conditions in this Dominion?

For Canada, with all deference to her sister Dominions, has become the keystone of Empire trade. Her natural resources are so great, her productivity so tremendous that she is recognized as the greatest factor in the imperial trade situation.

Would not the world get a fairer report of the conference if the visiting press representatives saw all this at first hand before the conference started and before their views were colored with the varying tints of statesmanship? —Vancouver Sun.

Finland Is Building

Pocket Battleships Will Withstand Broadside Fire Of the Largest Cruisers

Work has been started on two new fighting ships for the Finnish navy which are as remarkable in their way as the German pocket battleship, according to the Daily Telegraph's naval correspondent. They are, he says, miniature battleships of 4,000 tons, designed for coast defense operations in the Baltic, with Diesel electric drive and a speed of 16 knots.

Each of these little ships mounts a formidable armament of four 10-inch guns in turrets and eight 4.5-inch quick firers and there is a substantial armour protection of vital parts.

They are under construction at the Crichton Vulcan yard at Abo, Finland, and are due to be completed in 1933. The smallest capital ships in the world, they are said to be able to withstand the broadside fire of the largest cruisers and are more strongly protected. They are being built by native labor and largely from domestic materials, as were four submarines now in the Finnish navy.

Drumming Up Business

British hat makers are circulating banks and insurance companies asking that they compel their employees to wear hats to business. The hat makers passed a resolution that hats add a finishing touch to personal appearance and "dignity to the position they hold."

The main reason why we have so few stable governments is that it requires so much horse sense.

Since 1880 Mulre has cut nearly 44,000,000,000 feet of lumber.

"What is the matter? I can't ever get my glass full." —Journal Amant, Paris.

FASHION

No. 668—Sunday Night Frock. This style is designed in sizes 16, 18, 20 years, 26, 28, 30 and 42 inches bust measure. Size 26 requires 2½ yards of 39-inch material with 1½ yards of lace edging.

No. 124—Miss Line Undies. This style is designed in sizes 14, 16, 18, 20 years, 36, 38 and 40 inches bust measure. Size 16 requires 1½ yards of 39-inch material with 5¼ yards of binding.

No. 328—Moulds the Figure. This style is designed in sizes 14, 16, 18, 20 years, 36 and 38 inches bust measure. Size 16 requires 2½ yards of 39-inch material with 2½ yards of edging.

No. 692—Lumber Jacket. This style is designed in sizes 8, 10, 12, 14, 16, 18, 20 years, 36, 38, 40, 42 and 44 inches bust measure. Size 16 requires 2½ yards of 36-inch material with 1½ yards of 6½-inch knitted fabric.

No. 806—Lovely School Wear. This style is designed in sizes 8, 10, 12 and

14 years. Size 8 requires 2½ yards of 39-inch material with ½ yard of 33-inch contrasting.

No. 884—Snappy Model. This style is designed in sizes 8, 10, 12 and 14 years. Size 8 requires 2 yards of 39-inch material with ½ yard of 39-inch contrasting.

THE HOUSE OF DREAMS-COME-TRUE

— BY —
MARGARET FIEDLER

The "Splendid Days of the Hermit of Far Rock,"
Holt & Roughton, Ltd., London.

CHAPTER IX.—Continued

Jean's heart gave a violent throb, and the laughter went suddenly out of her voice as she repeated blankly: "To forget Montvann?"

"Please," I said and did—no mad things that day we spent together. It was to be an uncounted day, you know, and—oh, well, the air of the Alps is heady! I want you to forgive me and to blot out all remembrance of it."

He seemed to speak with some effort, yet each word was uttered deliberately, searing its way into her consciousness like a red-hot iron.

The curt, difficultly spoken sentences could only signify one thing—that he had meant nothing, not even good, honest comradeship, that day at Montvann. He had merely been amusing himself with a girl whom he never expected to meet again, and now that circumstances had so unexpectedly brought them together he was clearly anxious that she should be under no misapprehension in the matter.

Jean's pride writhed beneath the insult of it. It was as though he feared she might make some claim upon his regard and he wished to warn her, almost in so many words, not to set a fictitious value upon anything that had occurred between them. The glamour was indeed torn from her stolen day on the mountains. The whole memory of it, it shoves all the memory of that pulsing moment of farewell, would henceforth be soiled and vulgarized—converted into a rather sordid little episode which she would have gladly blotted out from amongst the concrete happenings of life.

The feminine instinct against self-betrayal whipped her into quick speech.

"I've no wish to forget that you practically saved my life," she said. "I shall always—lightly—feel very much obliged for that."

"You exaggerate my share in the matter," he replied carelessly. "You would have extricated yourself from your difficulties without my assistance. I have no doubt. Or, more truly—with a short laugh—"You would never have got into them."

He said no more, but let out the car and they shot forward into the gathering dusk. Presently they approached a pair of massive iron gates admitting to the main drive, and as these were opened in response to a shrill horn from Torin's barn the car swung round into an avenue of elms, the bare laughs, interlarded overhead, making a black network against the moonlit sky.

Still in silence, they approached the house, its dim grey bulk, looming indistinctly through the evening mist, studied here and there with a glowing shield of orange from some unadorned window, and almost before Torin had pulled up the car, the front door flew open and a white ribbon of light streamed out from the hall behind.

Jean was conscious of two or three figures grouped in the open doorway, dark against the welcoming blaze of light, then one of them detached itself from the group and hastened forward with outstretched hands.

"Here you are at last!"

For an instant Jean hesitated, doubtful as to whether the speaker could be Lady Anne. The voice which addressed her was so unambiguously young—clear and full of vitality like the voice of a girl. Then the light flickered on to hair as white as if it had been powdered, and she realized that this surprisingly young voice must belong to her hostess.

"I was so sorry I could not meet you at the station myself," continued Lady Anne, leading the way into the house. "But a tiresome visitor turned up one of those people who never know when it's time to go, and I simply couldn't get away without forcibly ejecting her."

In the fuller light of the hall, Jean discerned in Lady Anne's appearance something of that same quality of inherent youth apparent in her voice.

The keen, humorous grey eyes beneath their black, arched brows were alertly vicious, and the quite white hair served to enhance, rather than otherwise, the rose-tinted texture of her skin. Many a much younger woman had envied Lady Anne her complexion; it was so obviously genuine, owing nothing at all to art.

"And now," Jean felt herself pulled gently into the light—"let me have a good look at you. Oh, yes!"

Lady Anne laughed amiably—"you have just this chin with that delicious little cleft in it. But your eyes and hair are Jacqueline's." She leaned forward a little and kissed Jean warmly. My dear, you're very welcome at Staple. There is nothing I could have wished more than to have you here—except that you could have prevailed upon Glyn to bring you himself."

"When you have quite finished going into the ancestral details of Miss Peterson's features, madonna, perhaps you will present me?"

Lady Anne laughed good-humouredly.

"Oh, this is my pushing younger son, Jean. (I'm certainly going to call you Jean without asking whether I may.) He's already made acquaintance with Blaise. This is Nick."

Nick Brennan was as unlike his half-brother as he could possibly be—tall, and fair, and blue-eyed, with a perfectly charming smile and an air of not having a care in the world. Jean concluded he must resemble closely the dead Claude Brennan, since, except for a certain family similarity in cut of feature, he bore little resemblance to his mother.

"Blaise has had an hour's start of me in getting into your good graces, Miss Peterson," he said, shaking hands. "I consider it very unfair, but of course I had to be content—as usual with the younger son's position."

Jean liked him at once. His merry, lazy blue eyes smiled friendship at her, and she felt sure they should get on together. She could not imagine Nick "glooming" about the house, as one of the women at the hotel had declared his half-brother did.

It occurred to her that it would simplify matters if both he and Blaise were made aware at once of her former meeting with Blaise, so she took the opportunity offered by Nick's speech.

"He's had more than that," she said gaily. "Mr. Torin and I had already met before at Montvann."

"At Montvann?" Lady Anne gave vent to an ejaculation of amused impatience. "If we had only known! Blaise could have accompanied you back and saved you all the botherous details of the journey. But we had no idea where he was. He went off in his usual way—smiling a shade ruefully—'merely' condescending to inform his yearning family that he was going abroad for a few weeks.' Then, as Torin, having remembered the car's chauffeur, turned the group in the hall, she turned to him and continued with a faint note of exasperation in her voice: 'You never told us you had already met Miss Peterson, Blaise.'"

"I didn't know if myself till I found her mired on the platform at Coombe Exotic," he returned. His eyes, meeting Jean's, flickered with bitter amusement as he added nonchalantly: "I did not catch Miss Peterson's name when we met at Montvann."

"No, we were not formally introduced," supplemented Jean. "But Mr. Torin was obliging enough to pull me out of an eight-foot deep snowdrift up in the mountains so we allowed that to count instead."

"What luck?" exclaimed Nick with fervour.

"Yes, it was rather," agreed Jean. "To be smothered in a snowdrift isn't exactly the form of extinction I should choose."

"Oh, I meant luck for Blaise," explained Nick. "Opportunities of playing knight-errant are few and far between nowadays," regretfully.

They all laughed, and then Lady Anne carried Jean off upstairs.

Here she found that a charming bedroom, with a sitting-room connecting, had been allotted her "so that you'll have a den of your own to take refuge in when you're tired of us," as Lady Anne explained.

Jean felt touched by the kindly thought. It takes the understanding business to admit frankly that a guest may sometimes crave for the solitude

of her own company—and to see that she can get it.

The rooms which were to constitute Jean's personal domain were delightfully decorated, old-fashioned tapestries and some beautiful oil-paints adorning just the right note in conjunction with the waxen-smooth mahogany of Chippendale. From the bedroom, where a maid was already busying herself unstrapping the traveller's baggage, the old-fashioned, tapestried and a white-tiled bathroom frankly and hygienically modern, and here Jean was soon splashing joyfully. By the time she had finished her bath and dressed for dinner she felt as though the fatigue of the journey had slipped from her like an outworn garment.

The atmosphere at dinner was charmingly informal, and presently, when the meal was at an end, the party of four adjourned into the hall for coffee. As Jean's eyes roved round the old-fashioned, tapestried place, she was conscious of a little intimate thrill of pleasure. With its walls panelled in Jacobean oak, and its open hearth where a roaring fire of logs sent blue and green flames leaping up into the chimney's cavernous mouth, it reminded her of the great dining-hall at Beirfels. But here there was a pleasant air of English coziness, and it was obvious that at Staple the hall had been adopted as a living-room and furnished with an eye to comfort. There were wide, cushioned window-seats, and round the hearth clustered deep, inviting chairs, while everywhere were the little, pleasant, home-like evidences—an open book lying down here, a piece of unfinished needlework there—of daily use and occupation.

(To Be Continued.)

THE RHYMING OPTIMIST

By Aline Michaels

A CELEBRITY'S DIARY

She summons them all, the books she read.
The tale of her work and play.
The cities she saw as the swift years sped.

Her jauntiness far away.

She wrote them there for the world to read.

In the years to come, maybe:
Her story of struggle, of want, of need.

Of courage and constancy.

She left a record of fame's bright blaze.

Of starting and strange events,
Aglimpses of her crowded, colorful days.

Of life, full-blown, intense.

But, search as we will, we do not find
A hint of her dreams revealed;

She shared the ways of her splendid mind.

But her soul was a room concealed.

In the end she left for the world to see

Of her life but the lesser part;

She told of her triumphs and victory,
But not of her woman's heart.

Unless worms be expelled from the system, no child can be healthy.
Mother Graves' Worm Expeller is an excellent medicine to destroy worms.

Results Are Satisfactory

Barley Ration Produces High Grade Oil Bacon and Beef

There is practically no limit to the production of barley in Canada and recent tests show that it produces better bacon and beef than other grains. It is proving fully the equal of corn when fed with suitable supplements in the form of home-grown leguminous roughages. Barley can be used in almost any proportion of the grain ration up to one hundred per cent. As a hog feed it develops an entirely satisfactory class of bacon, which is more than can be said for corn fed in equal proportions, and as a feed for beef cattle barley is undoubtedly one of the best of our Canadian-grown coarse grains. The increased use of barley and other coarse grains in the present low price levels will make for much better quality in the beef being marketed, and this in turn will help create a demand for more beef. Department of Agriculture

"Yes, it was rather," agreed Jean. "To be smothered in a snowdrift isn't exactly the form of extinction I should choose."

"Oh, I meant luck for Blaise," explained Nick. "Opportunities of playing knight-errant are few and far between nowadays," regretfully.

They all laughed, and then Lady Anne carried Jean off upstairs.

Here she found that a charming bedroom, with a sitting-room connecting, had been allotted her "so that you'll have a den of your own to take refuge in when you're tired of us," as Lady Anne explained.

Says Canada Strong In Day Of Trial

Bank Of Montreal Heads Review Situation At Bank's Annual Meeting

In the speeches of Sir Charles Gordon, president, and Jackson Dods, joint general manager, at the annual meeting of the Bank of Montreal, comment was made on the inherent strength being exhibited by Canada in the face of world depression, especially in regard to the banking structure of the country. Sir Charles while declining to prophesy as to the immediate outlook said that taking the long view "There is every reason to look forward with confidence to emerging stronger and more prosperous than ever from the conditions that now prevail," and Mr. Dods remarked, "It would be rash indeed to speak with assurance of the prospects of the coming year, but it is surely permissible to say that when international confidence and co-operation are restored, and commerce in consequence improves, Canada will be among the first to benefit."

Sir Charles Gordon made particular reference to the manner in which the low price levels have affected farming, lumbering, mining, and newspaper manufacture, remarking in regard to the latter that there was reason to believe that a better condition was being ushered in by the profit by which a number of newspapers on New York funds and from consolidation of companies for the purpose of reduc-

ing overhead expense and effecting more economical distribution of the product.

While expressing the opinion that Canada's large foreign obligations would tend to prevent an early return of the Canadian dollar to par, he said he had no doubt that it would return to par. As factors already working to that end he remarked that the adverse balance of trade had been reduced and that in the five months to October 31st last there was each month an excess of domestic exports over imports.

Jackson Dods, joint General Manager with W. A. Bagg, in presenting the balance sheet reviewed the progress made by the Bank during the fiscal year. Remarking that "we should be thankful that we in Canada are as well off as we are," he said business, nevertheless, was at a low ebb, and a halt must be called to mounting expenditures by federal, provincial and municipal authorities, as these only aggravated the situation. Referring to the fact that the downward movement of prices had reached its lowest point during the year, he pointed out the importance of a Central Bank in maintaining a stable price level as demonstrated by United States experience. Concluding, he urged the adoption of a policy by which as much support as possible will be made self-supporting by placing them on the land.

British Women Fliers

Five Hold License As Commercial Pilots For Hire

Seven years of private flying have established the Englishwoman as a noteworthy air pilot. Miss Amy Johnson of Australia, solo flier; Miss Winnifred Spencer, winner of numerous open races; Lady Bailey, lone air tourist of Africa, and Mrs. Victor Bruce, who flew solo to Japan, are Britain's best known women fliers.

A number of titled women such as the Duchess of Bedford, own private aeroplanes and do most of their travelling throughout Great Britain and the Continent by air.

A check showed that women pilots on October 1 held 112 Air Ministry "A" licenses, entitling the holder to pilot an aeroplane outside the immediate precincts of the aerodrome. Five women possess the "B" license, which permits the holder to fly as a commercial pilot for hire.

Douglas English Liniment is a quick, certain remedy for Hoof Rot or Thrush. Four or five applications are usually enough.

Russia Planning Ranches

Soviets Consider Purchase Of Five Hundred Beef Cattle In U.S.

Not content with buying several hundred beef cattle in Great Britain every year for the past two or three the Soviet Government is now considering the purchase of pure bred stock in the United States. Representatives of the American Russia buying organization in New York, are now making a survey of the pure bred beef cattle raising areas of the middle western states with a view to purchasing considerable numbers. It is claimed that a tremendous program of state cattle ranches is planned, where beef cattle would be raised under a management similar to the community wheat farms.

Little Helps For This Week

"Let the Lord do that which is good in His sight."—1 Chronicles 13: 12.

Our one sure safety we reject and fling. When once we make our good the test of His.

His final ends surpass our feeble sense. His plan is greater than our preference.

Who told us we had any right to bliss? Our ears are but our arrogant conceit.

Two things that grow and yield the sweetest sweet.

The lofty cocoa-palm and sugarcane As well as waters salt as on fresh rain.

Will thrive, and in their sap and fruit Convert no lurking taste of bitter will remain.

— H. H. —

Rest satisfied that whatever is by the appointment of Heaven is right, is best.—James Harvey.

I found it better for my soul to be humble before the mysteries of God's dealings, and not be making a clutter about what I could never understand.

— George Elliott.

Orders Special Machines

Cleveland Firm Supplying Mailing Equipment To British Government

The largest order ever awarded on addressing and mailing equipment was received by the Addressograph-Multigraph Corporation, which announced re-plot of a contract for 629 special machines from the British Government. President Joseph E. Rogers said it was the initial order to equip 1,500 postal offices in Great Britain in 1922. Specific cost of the order has been estimated to approach \$1,000,000.

Egypt, Arabia and India are in the same latitude as Florida.

Mountain View Notes

Mr. Hughie Roberts went on a business trip to Cardston last week.

Mr. Garnet Tighe was elected as the new trustee for Mona school district in the recent election.

Mr. G. Doll is to attend the trustees convention in Calgary next week as delegate of the Mona school-board.

The monthly meeting of the local W.I. was held in Community Hall, Thursday last, the chair being taken by the new president, Mrs. E. Blain, who gave a very fitting address. Mrs. Max Woods gave a very good paper on "Household Economics," which was followed by a contest, the prizes being awarded to Mrs. Topley and Mrs. Thompson. A presentation was made to the past president. At the close of the business session, refreshments were served by Mrs. Devolin and Mrs. Hill, when a social hour was spent.

A whist drive was held in the Community Hall Friday last under the auspices of the local W.I. It was a well attended affair and prizes went to the following: Mrs. H. Pearson, ladies 1st; Mr. Reggie Hamper, gentlemen's 1st. Consolations: Miss Oldham and Mr. S. Tighe. The sumptuous lunch provided was greatly enjoyed by all, and the ladies are to be congratulated on their efforts to make those evenings a success both socially and financially. Mr. Ed. Blain made a proficient M.C.

When the Tan-nis-uk Chapter of the I.O.D.E. in Calgary held its January meeting on Tuesday evening last, the sum of \$50.00 was sent to St. Helena School, Poonia, India; \$10.00 towards installing a radio for an ex-serviceman, and an I.O.D.E. library and two pictures are being forwarded to Mona School, Didsbury where a Tan-nis-uk Chapter scholarship winner, Miss Doris Brown is teaching. Mona school was recently built, and it is quite an honor to the district to be presented with this library and pictures through the scholastic ability of their teacher.

Springside Notes.

Harold, how about a berth on that cutter?

We are sorry to hear that Mrs. A. Korshus has left for the Hospital. We hope for a speedy recovery.

Mr. and Mrs. F. McDonald journeyed to Calgary on Thursday, returning Friday night.

Mr. and Mrs. Thede and family spent Wednesday evening at the Adam home.

The Misses Margaret Hardy and Ruth Gabel spent the week-end with the former's parents.

Mr. A. McNaughton, returned from the Calgary hospital Saturday night. Alex didn't do so well this time.

Mr. and Mrs. L. Morneault and daughters Beatrice, Marie and Cecilia of Carstairs, were dinner guests of Mr. LeClaire.

On his return from Edmonton, Roy McNaughton reports some lively discussions during the U.F.A. convention, which he attended as delegate, but he wonders what kept him there two days after the close.

On Wednesday evening the 20th inst. a large gathering attended the first meeting of the "Springside Social Club." Future socials were planned, pros. and cons. aired out and details discussed. A management committee was selected, comprising Messrs. E. LeClaire, chairman, F. McDonald, secretary, W. Hardy and K. Dunner, directors. It was decided to hold the first "affair" on Friday, 29th January at 8 p.m., the program being in the hands of Mrs. H. Becker, Miss Ewing and Mr. A. Chamberlain. A nice program has been arranged and it is hoped that all the community folks and their friends will be present.

If you have anything you don't need, we can sell it for you. Bring in your surplus goods. Someone is continually calling for the things you've got—W. H. Chamberlain's Remoulding Store.

FOR SALE—Mammoth Bronze Turkey
Tom: \$5.00 to \$10.00. Hens: \$2.00 to \$8.00. Apply: Mrs. M. SHANTZ, Phone R105.

Melvin Notes

The Go-Getters now have 65 ft. of pennies.

Don't forget the Go-Getters' dance at Melvin, February 5th.

Miss Helen Moon, of Didsbury, spent Sunday with Mr. and Mrs. Emil Krebs.

Mr. and Mrs. L. Chandler visited Mr. and Mrs. Lloyd Chandler on Sunday.

Mrs. C. E. Youngs visited friends in Calgary for a few days.

Mr. Wyman O'Brien is spending the week with Mr. Sidney O'Brien east of town.

Mr. and Mrs. W. Brown, of Rugby, visited Mr. and Mrs. A. Krebs on Sunday.

Mrs. Glen Johnston and children are spending the week with Mrs. Alma Good, at Garfield.

Westerdale Club team are playing the Go-Getters, on Saturday evening at Melvin School. Every one come and have a good time.

The whist party at the school held by the Go-Getters, on Tuesday night, was a success. Miss Elva Fisher, won ladies' first prize, Mr. Otto Krebs, gent's first, Mrs. Carlson, ladies' consolation and Mr. Randol Johnston, gent's consolation.

NOTICE OF ANNUAL MEETING.

Public notice is hereby given that a meeting of the electors of the Town of Didsbury and the Didsbury School District No. 652 will be held in the High School building, Didsbury, on Friday the 29th day of January, 1932 at 8 o'clock p.m. for the purpose of receiving the auditor's report of the finances of the town up to the preceding thirty-first day of December, and for the purpose of receiving the reports of the chairmen of the various committees of the council, and to hear the reports of the school trustees as prescribed by the School Act.

Dated at Didsbury, Alberta this 19th day of January, 1932.

W. A. AUSTIN,
Secretary-Treasurer.

NOTICE OF NOMINATION MEETING.

Town of Didsbury Municipal Elections, 1932, and Didsbury School District No. 652 Elections, 1932.

Public notice is hereby given that a meeting of the electors of the Town of Didsbury and Didsbury School District No. 652 will be held in the Town Office, Didsbury, on Monday, first day of February, 1932 from 11 o'clock in the forenoon until 12 o'clock noon, for the purpose of nominating candidates for the offices of councillors and school trustees for the next ensuing two years.

Given under my hand at Didsbury, Alberta this 19th day of January, A.D. 1932.

W. A. AUSTIN,
Returning Officer.
